Astrid V. Arana - Rivera

aranaastrid231@gmail.com | (956) 376-5682 | LinkedIn | GitHub | McAllen, Texas

PROFESSIONAL SUMMARY

Data Analyst with an M.S. in Business Analytics and experience using Python, SQL, Tableau, and Excel to analyze operational data, automate workflows, develop predictive models, and deliver actionable business insights in supply chain. Experienced in data cleaning, exploratory analysis, statistical analysis, machine learning, dashboard development, and process automation. Proven track record of improving operational efficiency by automating reporting and customs workflows, including reducing processing time by 73%.

EDUCATION

The University of Texas Rio Grande Valley **Edinburg, TX**
Master of Science in Business Analytics
Overall GPA: 3.91/4.0, Summa Cum Laude
Relevant Coursework: Data Mining for Business Analytics (Unsupervised and Deep Learning), Machine Learning for Business Analytics, Healthcare Analytics, Healthcare Information Systems

Bachelor of Arts in English with Teaching Certification (4-8)
Overall GPA: 3.7/4.0, Magna Cum Laude

PROFESSIONAL SKILLS

Programming & Query Languages: Python (Pandas, NumPy, Scikit-learn), SQL, R
Machine Learning: Regression, Classification, Decision Trees, Random Forest, Predictive Modeling, Feature Engineering, Model Evaluation
Statistics: Exploratory Data Analysis, Statistical Analysis, Forecasting, Correlation
Data & Databases: MySQL, Excel, Power Query
Visualization: Tableau, Matplotlib, Seaborn
Tools: GitHub, Jupyter Notebooks, VS Code, Google Colab
Languages: English (Fluent), Spanish (Professional)

WORK EXPERIENCE

TradeFlex Supply Chain Solutions **McAllen, TX**
Data Analyst I – Compliance & Customs Operations | SQL, Python, Tableau, Excel *Sept 2025 – Present*

- Analyzed weekly shipment and customs data to identify operational trends, data discrepancies, and process improvement opportunities.
- Conducted year-over-year analyses of logistics data using SQL and Excel to evaluate shipment trends and support forecasting and capacity planning.
- Developed and maintained Tableau dashboards tracking operational performance, workflow efficiency, and monthly KPIs to support management decision-making.
- Developed Python automation tools that reduced weekly customer reporting preparation time by 50%, from approximately 60 minutes to 30 minutes.
- Automated customs entry processing workflows using Python, reducing processing time by 73%, from 105 minutes to 28 minutes, and improving operational efficiency.

PROJECTS

Amazon Delivery Performance Prediction Project | Python, SQL, Machine Learning *May 2026*

- Analyzed delivery data to identify operational factors affecting delivery times across weather conditions and geographic areas.
- Built and evaluated Linear Regression and Random Forest models using Python (Pandas and Scikit-Learn) to predict delivery delays and identify key operational drivers.
- Discovered that semi-urban locations and low-visibility weather conditions contributed most to delivery delays, while prolonged delivery times correlated with lower agent ratings.

- Generated actionable insights to support routing optimization, resource planning, and customer satisfaction improvements.

CERTIFICATIONS & TRAINING

Python for Data Science, AI & Development | IBM **June 2024**
